Screen Printed DVD-R Template

bulkovodisc

This template prints 1mm (0.08 inches) short of the disc, ideally to the other side of the disc, 0mm. Very rare some models differ 1mm or slightly adjusted the overall dimensions from the disc and so the disc does not fit. Within circumference, 0mm, 0.08 inches.

ART FILES:
- We prefer vector Illustrator files, but also accept Photoshop, Lifeimage or Tif files. Please make sure to convert fonts to outlines. Place all fonts in a folder in the template folder.
- Please make sure the file is CMYK.
- Place all cuts and artwork, that are not meant to bleed, 1/16 inch (1.5mm) inside the cut line of the template.
- To avoid having to send fonts, convert your text to outlines.
- Do not place any text on the cut line.
- We support Mac and Pc files and Windows type fonts. Please send us the Postscript version of the fonts if you are using Type 1 fonts. Do not use TT (Truetype) fonts into one schmoo file. Don't forget to send whole fonts folder and not individual fonts.
- Do not place any artwork in layers and groups, which cut or not for the template, it will produce a wrong cut line.
- All files can be uploaded through our website. Please contact us for more information.

COLORS - Only use Pantone Solid Coated Colors or CMYK colors.
- Do not use any other colors, RGB or Pantone Process colors.
- Do not convert spot to process colors or vice versa.
- Do not place any colors on the cut line or bleed. Place all cuts and the printed artwork, 1/16 inch (1.5mm) inside the cut line.

QUANTITY LIMITS:
- Minimum production size 50 units for NONE.

SIZE DIMENSIONS:
- anywhere from 5 pounds (5 pounds for CDPRO, 10 pounds for CDPRO with Jewel Box or Digipak) - maximum 7 pounds.
- maximum file - 5 gigabyte.
- bleeding - 25 - 116mm (1 - 4.5 inch) arrow.
